

Let's Face It

Registered charity No 1043461
Network for the facially disfigured

YOU ARE NOT ALONE...
With your fears and worries
why or how a face is disfigured ...

WE UNDERSTAND ...
Because we have been there and ...

WE HAVE SURVIVED!
(no problem is too big or too small)

LET'S FACE IT has several Support Groups throughout the
country

helping and supporting people with facial disfigurement.

LFI was founded by Christine Piff who realised after
undergoing
extensive surgery, radiotherapy and chemotherapy for facial
cancer, how

little support there is for people with facial disfigurements.

LET'S FACE IT welcomes people with facial disfigurement
whether it is due to cancer, burns, birth marks, Bell's palsy or
any form

of facial 'difference' and who feel they and their families and
friends

would benefit from sharing and caring with other facially
'different' friends..

-----We offer-----

One to one Support and Counselling

Telephone counselling to patients and families
